

## Cannon AFB

**Customer:** Cannon AFB – Clovis, NM

**Building Series:** MQ

**Application:** Shade Shelter

### The Need

The USAF needed a [fabric building](#) to protect equipment and aviation personnel at Cannon AFB in New Mexico from the extreme heat and UV conditions of the American Southwest.

### The Intention

The 70' by 70' structure had to be durable, quick to erect, and inexpensive while meeting strict Military safety standards. The fabric shade shelter was constructed using a galvanized MQ frame and is designed to resist winds exceeding 110 mph. The exterior fabric membrane is a 28 oz. /sq. yd. Shelter-Rite PVC coated fabric. Shelter-Rite fabric, manufactured in the USA, provides warranted durability, UV protection, and cost-effectiveness.

### The Solution

### We Believe in our Buildings

Shelter Structures is a specialized team of professionals created to provide innovative solutions for a wide range of high profile clients. We pride ourselves on service before and after the sale. We stand behind our fabric buildings and will work with you every step of the way to ensure that you get the exact building solution you need. Our buildings are usually manufactured in 6-8 weeks and can be shipped anywhere in the world.
