

Weather Protection Shelter – Fort Gordon

Customer: US Army, Fort Gordon GA

Application: Weather Protection Shelter

When the Army needed additional training space for the soldiers at Fort Gordon, GA, they turned to Shelter Structures, Inc. for their solution. Shelter Structures, Inc. is a leading provider of weather protection shelters for the Armed Forces and Fortune 500 companies throughout the United States. Our [military fabric buildings](#) can be designed, manufactured and installed in 6-8 weeks. Our unique frame design eliminates treacherous ground rails that not only collect debris, but can be a trip hazard as well. Our clean span design allows maximum utilization of the area being covered. Built of heavy duty 3" square steel galvanized tubing and 20oz coated vinyl fabric, this building will provide years of service. Whenever you need weather protection, either for personnel or equipment, turn to Shelter Structures, Inc.
